

Small Blessings

Summer 2017 Registration

We are very excited about the plans that we have for this summer at Small Blessings. Our program will be held on **Tuesdays, Wednesdays and Thursdays, 9:00-12:30**. This year the parents will provide both a snack and lunch. During the summer we follow the school year routine and incorporate the fun activities of summer camp. The program will include time to create, sing, dance, and science exploration as we learn new things about God's world and people. Activities will include playground, circle, story time, centers and pretend play, cooking and music. Water play and other special experiences will be part of each session.

Child's name: _____ **DOB:** _____

Sex: M or F **School child attends/will attend during school year:** _____

Parents names: _____ **Email address:** _____

Street address: _____ **Phone:** _____

_____ Session 1 ***Fun in the Sun*** June 13-22 **\$245**

Summer is here, let the fun begin. Sandcastles, shells and waves roll in. Games on the beach, crafts to make, campfire sing-a-long and summer treats to taste. The power of the water and wind we'll explore, along with the animals on the sea shore. The sun is a star with power and light, we'll learn how it helps us stay healthy inside. Come join us this session, it will be full of fun. It's a great way to start your summer in the sun.

_____ Session 2 ***Sense-a-palooza*** July 11-13, July 17-19 **\$245**

Your five senses make the world a more enjoyable place. We use them everyday to get to know the world and understand ourselves. During this camp the children will become scientists of the human body and discover the ways we learn through sight, sound, taste, touch and smell. A lab of sensory integration activities will enable them to explore, create a hypothesis, predict, investigate, compare and contrast, and communicate their findings. The five senses will open their sense of curiosity and will offer many possibilities for discovery and exploration. ***Please note the second week is Mon, Tues, Wed in this session.***

_____ Session 3 ***Construction Zone*** July 25– Aug 3 **\$245**

Creative thinking and problem solving will come into play as the children engage in engineering challenges. Shapes, motion and mechanics are just some of the things that will be examined as the children think for themselves to create and design one of a kind structures and simple machines using a wide range of tools and materials. Our construction zone will incorporate some elements of physics as the children are exposed to magnets, planks, pulleys, wheels and axels, and pendulums. Grab your hard hat.....great minds are being built!

The camp fees includes registration, tuition, supplies and special events.

Fees are due at registration and registration is not complete without payment.

We offer the following discounts:

\$20 off tuition for registration before March 24, 2017. Please deduct the \$20 before applying any other discounts.

5% discount if registering for all three sessions at one time.

10% discount for second and third children in a family.

Please include your payment with this form and return to us.

Payments are non-refundable unless we are unable to place your child in a class.
